

Leslie[®]
Speaker

610

- ◆ Designed for multi-channel organs
- ◆ Individual treatment for each of three channels
- ◆ Two types of tremolo sound

The Leslie Speaker Model 610 has three amplification and speaker channels, each completely independent from one another. In this way, each segment of the organ's output can be treated in a manner which best enhances its tonal integrity. The Flute/Tibia section is glowing and warm. Strings/Reeds/Diapasons glisten with brightness. The Pedal is deep and authoritative. The Model 610 also features two different types of tremolo sound: one is rich and full in the tradition of world-famous Leslie speakers. Another is milder in feeling, thereby extending the spectrum of musical tone color. All these systems work together to create an unforgettable musical experience... "sound in motion" which is both majestic and inspiring.

Specifications:

Dimensions: 41" high, 29" wide,
20½" deep.
