

Leslie[®] Combo Speaker

925

- ◆ Single channel, double rotor
- ◆ High-power system with full-fidelity JBL speakers
- ◆ Three separate channels of amplification

The Model 925 is a professional speaker suitable for use in large open areas. The finest high-power JBL speakers are electronically and acoustically matched to the world-famous Leslie bass rotor and horn rotor systems. Special amplifier/speaker complexes were engineered to provide tremendous sound output without distortion, reproducing both very high and very low frequencies with amazing fidelity. Adding additional heft to the sound, a network of four 6x9 stationary speakers further embellish the music power. Measured in continuous undistorted output, the Model 925 produces 140 watts RMS (peak output 280 watts). With more efficient handling of the organ's input, the apparent sound of the 925 is nearly double that of the most powerful Leslie speaker ever made!

Deluxe Combo Pre-Amp connects to single channel combo organ plus guitar...or two guitars or a two channel organ. Separate foot switches control rotors (off-slow-fast) and stationary speakers.

Specifications

Dimensions: Top section 28 1/4" wide, 20 1/2" deep, 14 5/8" high.
Bottom section 28 1/4" wide, 20 1/2" deep, 37 1/2" high.
Total assembled height including casters, 54".
Amplification: 3 separate channels, 140 watts RMS (continuous undistorted output).
Speakers: High powered, high frequency JBL driver, high-power JBL bass speaker, four 6x9 stationary speakers.
Weight: Top section, 87 lbs; bottom 127 lbs.
Electrical: 117 V, 60 Hz. AC.
Guarantee: One year from date of purchase.
